

THE AI BESTIE

AI tutorials even your mom can understand

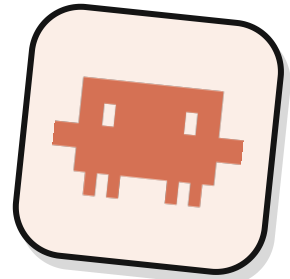

LESSON 1

What is Claude Code?

No tech words. No scary stuff. Just the simplest explanation you'll ever read. Pinky promise.

Zero coding

You will not write a single line of code. Ever.

Plain English

If you can text a friend, you can do this.

5-min reads

Tiny lessons. Big results. Save & follow.

In this lesson you'll learn...

- ✓ How to get it & set it up in 3 steps
- ✓ What Claude Code actually is — in plain words
- ✓ The amazing things it can build for you

Let's get you set up

3 quick steps. Tap any black box to copy.

1

Get Claude Code

Open **Google Chrome** or **Safari**, go to this site, download & install:

OPEN IN YOUR BROWSER

copy

claude.com/download

Prefer a Terminal? Paste one of these & press Enter:

Terminal is an app already on your computer. **Mac:** search “Terminal”. **Windows:** search “PowerShell”.

PASTE IN TERMINAL · MAC / LINUX

copy

```
curl -fsSL https://claude.ai/install.sh | bash
```

PASTE IN POWERSHELL · WINDOWS

copy

```
irm https://claude.ai/install.ps1 | iex
```

2

Open it & sign in

Open the app and sign in. You'll need a **Claude Pro or Max** plan.

Used the Terminal? Launch it with:

RUN IN TERMINAL

copy

```
claude
```

3

Make your first thing

Type your wish. Paste this to start:

YOUR FIRST PROMPT

copy

Build me a cute one-page landing page for my coffee brand. Soft pastel colours, a big friendly headline, a sign-up button, and a little about-me section. Make it gorgeous.

be specific. be delusional. your yap is your superpower.

Okay... but what *is* it?

Let's start with the one sentence that explains everything.

Claude Code is like a **super-smart friend who lives inside your computer.**
You tell it what you want — in **normal everyday words** — and it **builds it for you.**

Explain it like I'm 5?

It's a magic helper. You **tell it your wish** ("make me a website for my bakery") and it **makes the thing appear** — right in front of you. You watch it happen, like magic. No spells required.

Wait — is this the Claude app?

Almost! Same brain — but two very different jobs.

The Claude app

You **chat**, it **talks back**. Like texting a genius friend. Great for answers, ideas and advice.

It tells you things

Claude Code

It doesn't just talk — it **builds**. Websites, files, tools... it actually **makes the thing**, live.

It makes things

"Zero coding skills — and I use Claude better than most engineers."

— Wendy, your AI Bestie

So... what can it make for you?

A little taste. You describe it — Claude Code builds it.

Websites

A gorgeous site for your biz, brand or big idea.

Little apps

Tools, trackers & calculators made just for you.

Tidy your files

Sort, rename & organise the mess in seconds.

Content

Posts, captions, graphics & ideas on tap.

Fix stuff

Broken thing? Describe it. It troubleshoots.

Automate

Boring, repetitive tasks — done for you.

The only skill you actually need

Knowing **what you want**. That's it. The more you describe, the better it builds — so be specific, be **delusional**, dream big.

your yap is your superpower
